

SUJA SUBRAMANIYAN

Software Developer | Java | Python | Web Development
2/51, Middle Street, Polagam | 8778952389 | sujasubu2005@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Science and Business Systems graduate with hands-on exposure to Java, Python, SQL, HTML, CSS, and JavaScript through academic projects and internships. Strong foundation in object-oriented programming, problem solving, databases, and basic web development. Quick learner with a strong interest in software development and a willingness to learn new technologies.

EDUCATION

Bachelor of Technology in Computer Science and Business Systems <i>E.G.S. Pillay Engineering College (Autonomous), Nagapattinam — CGPA: 8.9</i>	2022 – 2026
Higher Secondary Education (Class 12) <i>Government Higher Secondary School, Thirumarugal — 73%</i>	2021 – 2022
Secondary Education (Class 10) <i>Government High School, Polagam — 90%</i>	2019 – 2020

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, JavaScript

Web Technologies: HTML5, CSS3, JavaScript, Responsive Web Design

Backend & Programming: Java, Python, Basic REST API Concepts

Database: MySQL, SQL

Core CS Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC)

Tools & Other: Git, GitHub, VS Code, Machine Learning Fundamentals, Data Analysis, Debugging

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Quick Learning

PROJECTS

Stock Price Prediction with High Accuracy Using Hybrid ML Algorithms

Python, Machine Learning, Data Analysis

- Worked on data preprocessing and feature selection for stock price prediction.
- Explored a hybrid machine learning approach by combining multiple algorithms and evaluating predictive performance.

Voyage Estimate WayFinder — Travel Planner (Mini Project)

HTML, CSS, JavaScript

- Built a responsive, web-based travel planner enabling users to estimate travel costs and identify optimal routes.
- Implemented structured data handling and algorithmic logic to deliver accurate, real-time trip planning results.

INTERSHIPS

Python Intern — CodeAlpha

- Developed an interactive chatbot application using Python and Natural Language Processing (NLTK) to simulate real-time user conversations.
- Built a Hangman game from scratch, applying core programming logic, control structures, and user-interaction design.
- Created a portfolio management system to efficiently track, analyze, and manage financial data.

Java Full Stack Development Virtual Internship — AICTE Eduskill

- Developed responsive, cross-browser web applications using HTML, CSS, and JavaScript for the frontend, with Java powering backend logic.
- Built and integrated RESTful APIs and handled database operations with MySQL across the full software development lifecycle.
- Collaborated on end-to-end web application development, gaining hands-on experience with Agile-based development workflows.

ACHIEVEMENTS & CERTIFICATIONS

- Completed a comprehensive programming course in C, C++, and Java at CSC Computer Education (Nov 2025).
- Qualified in the TCS National Qualifier Test (NQT) Cognitive 2025, scoring 62.36% in quantitative aptitude, logical reasoning, and verbal ability.
- Solved 1,000+ programming problems on SkillRack, demonstrating strong problem-solving, logical thinking, and programming skills.
- Completed NPTEL certification in Cloud Computing, scoring 73% (2025).
- Completed NPTEL certification in E-Business, scoring 55% (2026).
- Certified in UI/UX Design — Datanerdz.ai.
- Certified in Full Stack Development — Datanerdz.ai.
- Awarded Departmental Topper in college.
- Received Best Project Award for academic project.
